#### 1. BACKGROUND

In its capacity as the Principal Recipient (PR) of the Global Fund grant, the National Department of Health (NDoH) has secured funding through the COVID-19 Response Mechanism (C19RM), as approved by the Global Fund. This funding is allocated for implementation until December 2025. Among the approved activities under the C19RM grant is the procurement of equipment for provincial government pharmaceutical depots. These initiatives are central to strengthening the Department of Health's (DoH) preparedness and response capacity in combating future pandemics.

The Institute of Health Programs and Systems (IHPS) has been appointed as one of four subrecipients by the NDoH to implement Global Fund TB/HIV programs. The initial implementation period runs from 1 April 2022 to 31 March 2025, with an extension granted from 1 April 2025 to 30 September 2025.

In this context, the NDoH, through IHPS, seeks to appoint qualified and experienced service provider(s) to procure, install, validate, commission, and maintain equipment across ten (10) provincial government pharmaceutical depots. These depots are critical to ensuring the uninterrupted supply of essential medicines to 84% of South Africa's population. Their effective functioning underpins the safe and efficient distribution of medicines, supports public health outcomes, and ensures ongoing compliance with regulatory standards. The procurement initiative is therefore aimed at strengthening storage, distribution, and management systems for pharmaceutical products to improve healthcare service delivery.
